

# *Moving into the Digital Age*

*By Ona Strikas*

These days, it seems everything revolves around the internet. One can watch movies, pay bills, and buy groceries, all online. We are currently trying to catch the wave of internet networking by a few new extensions of Skagit Fisheries Enhancement Group.

We are now on Facebook. You can find us by simply typing 'Skagit Fisheries Enhancement Group' into the search bar. This Facebook page allows you to easily view photos, track our upcoming public events, and get to know our organization in a more dynamic platform.

We are also updating our website at <http://www.skagitfisheries.org>. Please pardon our appearance on the website while we are under construction. Soon we will have a more informative, and more user friendly website.

If you have any questions about this transition, feel free to email me at [education@skagitfisheries.org](mailto:education@skagitfisheries.org), or call the office at 360-336-0172.
